DML Commands

1.) INSERT

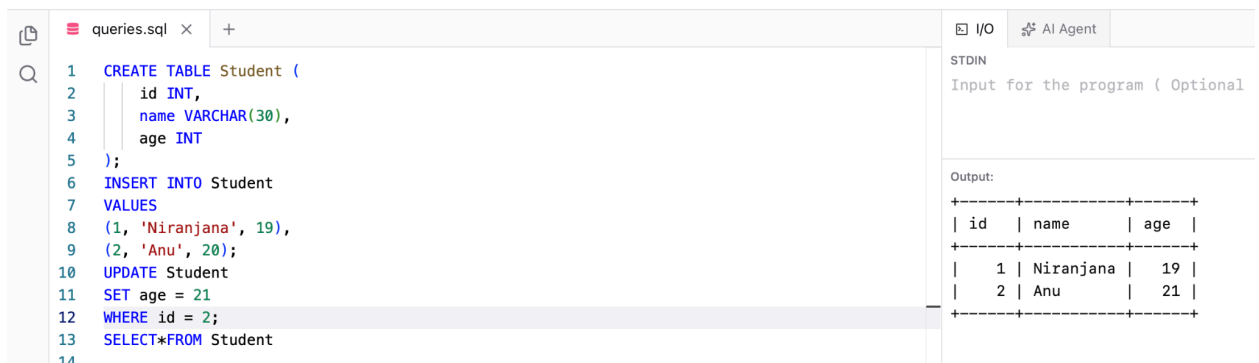

The screenshot shows a SQL IDE with a query editor on the left and a results/output pane on the right. The query editor contains the following SQL code:

```
1 CREATE TABLE Student (  
2     id INT,  
3     name VARCHAR(30),  
4     age INT  
5 );  
6 INSERT INTO Student  
7 VALUES  
8 (1, 'Niranjana', 19),  
9 (2, 'Anu', 20);  
10 SELECT*FROM Student  
11
```

The results/output pane on the right shows the output of the SELECT statement. It includes a section for STDIN (Input for the program (Optional)) and an Output section. The output is a table with 3 columns: id, name, and age.

id	name	age
1	Niranjana	19
2	Anu	20

2.) UPDATE

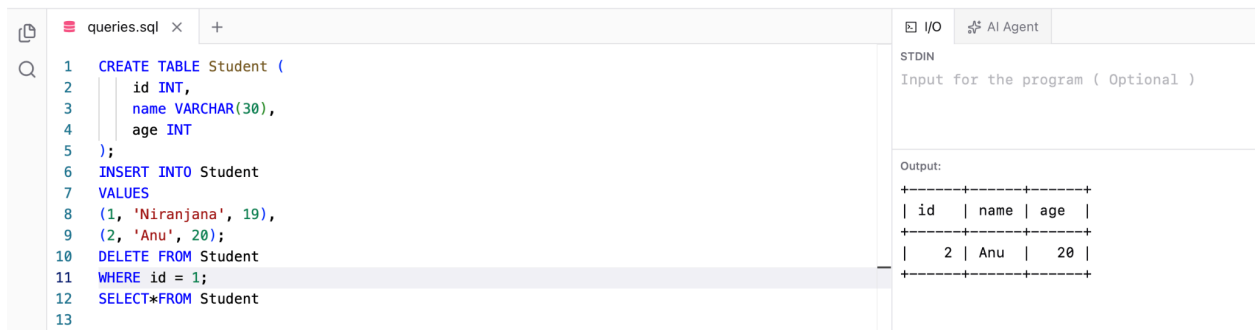

The screenshot shows a SQL IDE with a query editor on the left and a results/output pane on the right. The query editor contains the following SQL code:

```
1 CREATE TABLE Student (  
2     id INT,  
3     name VARCHAR(30),  
4     age INT  
5 );  
6 INSERT INTO Student  
7 VALUES  
8 (1, 'Niranjana', 19),  
9 (2, 'Anu', 20);  
10 UPDATE Student  
11 SET age = 21  
12 WHERE id = 2;  
13 SELECT*FROM Student  
14
```

The results/output pane on the right shows the output of the SELECT statement. It includes a section for STDIN (Input for the program (Optional)) and an Output section. The output is a table with 3 columns: id, name, and age.

id	name	age
1	Niranjana	19
2	Anu	21

3.) DELETE

The screenshot shows a SQL IDE with a query editor on the left and a results/output pane on the right. The query editor contains the following SQL code:

```
1 CREATE TABLE Student (  
2     id INT,  
3     name VARCHAR(30),  
4     age INT  
5 );  
6 INSERT INTO Student  
7 VALUES  
8 (1, 'Niranjana', 19),  
9 (2, 'Anu', 20);  
10 DELETE FROM Student  
11 WHERE id = 1;  
12 SELECT*FROM Student  
13
```

The results/output pane on the right shows the output of the SELECT statement. It includes a section for STDIN (Input for the program (Optional)) and an Output section. The output is a table with 3 columns: id, name, and age.

id	name	age
2	Anu	20
